

As part of their ongoing commitment to your eye health, the Doctors at Premier Eyecare recommend the Optomap Retinal Exam as part of your yearly comprehensive eye examination. This advanced screening technology is the Doctors' preferred way of obtaining a comprehensive view of your retina *without having to dilate your eyes*. The wide-field digital image is used for early detection and management of eye diseases such as macular degeneration, glaucoma, retinal detachment, and ocular tumors, as well as systemic diseases such as diabetes, hypertension, and high cholesterol. The digital image will become a permanent part of your medical record and will be compared from year to year to ensure there are no changes. The Optomap Retinal Exam is fast, easy, and comfortable.

YES! I would like to have the Optomap Retinal Exam as part of my comprehensive eye examination today. I understand that there is an additional \$30 charge for this test and that it is not covered by most vision insurance plans.

NO, I am declining the doctor's recommendation to have the Optomap Retinal Exam as part of my comprehensive eye examination. I understand that the doctor may need to dilate my eyes today as part of the comprehensive eye exam.

I have read and understand the benefits of the annual Optomap Retinal Exam.

## Premier Eyecare Contact Lens Evaluation Fees\*

With the many changes in insurance coverage Premier Eyecare will use the accepted medical standards of two separate charges for all contact wearers, one charge for a standard eye health exam and an eyeglass prescription and a second charge for contact lens evaluation and management. You will now see a contact lens Evaluation Fee for the evaluation and management of your contact lenses whether you are a current, previous or new contact lens wearer. You will be responsible for any contact lens evaluation and management fees before a contact lens prescription can be given. You will note that we have the most affordable contact evaluation fees in the Bakersfield area and we are the last office in the area to adopt contact lens evaluation and management fees.

Existing Contact Lens Patient (No Change of Lens Type)		
All Types of lenses		
\$47		
Existing Contact Lens Patient (Changes)		
Spherical	Toric/Color/Monovision	Multifocal/Specialty Fit
\$55	\$60	\$70
New Contact Lens Fit & Train		
Spherical	Toric/Color/Monovision	Multifocal/Specialty Fit
\$95	\$135	\$150/\$160/\$225

\*This service fee includes evaluation, assessment, and prescription services related to contact lenses (not part of a standard exam). It also includes any follow up visits needed over the course of one year related to the fit or vision through the contact lenses. Visits related to medical conditions are not included.

**I have read and understand the contact lens evaluation fees. Initial:** \_\_\_\_\_
