

Hadden Eyecare Associates

Doctors of Optometry

The iWellnessExam only takes seconds to complete and provides information that can't be obtained by normal eye exam procedures.

We are excited to let you know that during your next visit to **Hadden Eyecare Associates - Bloomington**, you will experience the benefits of the latest advancement in primary eyecare – the **iWellnessExam™**. The iWellnessExam uses breakthrough technology called spectral domain optical coherence tomography or SD-OCT. **Similar to an MRI or CT scan**, the iWellnessExam captures high definition cross sectional images of your retina, which is the back of your eye, and allows our doctors to see in unprecedented clarity what may be invisible with traditional examination methods.

Many eye problems can develop *without warning* and progress *without symptoms*. In early stages, you may not even notice a change in your vision. But sight threatening conditions and diseases such as macular degeneration, glaucoma, diabetic retinopathy and others can be detected with a thorough evaluation of the retina, including the iWellnessExam.

The iWellnessExam is a fast, simple procedure that provides:

- A detailed scan report to show a healthy eye or detect very early signs of disease.
- A retinal thickness map and ganglion cell complex assessment giving your doctor detailed information not available by any other methods.
- The opportunity for you to view and discuss your iWellnessExam report with your doctor at the time of your exam.
- A permanent record for your file, which allows your optometrist to compare your iWellnessExam reports each year to look for changes.

Our doctors believe that everyone can benefit from this high level of care. We would however like to make a special recommendation for these specific patients to ask for the iWellnessExam™:

- **Diabetic Patients**, or patients with a family history of Diabetes
- **Smokers**, tobacco users, a family history of macular degeneration
- Patients being treated for **high blood pressure** or **cholesterol**
- Patients with **glaucoma** or a family history of glaucoma
- Patients with **cataracts** or a family history of cataracts

Everyone can benefit from the iWellnessExam, but we do strongly recommend it to specific patients.

At Hadden Eyecare Associates we are dedicated to providing our patients the best eye care possible and the iWellnessExam helps us achieve that. We look forward to seeing you soon!
