

As part of their ongoing commitment to your eye health, the Doctors at Premier Eyecare recommend the Optomap Retinal Exam as part of your yearly comprehensive eye examination. This advanced screening technology is the Doctors' preferred way of obtaining a detailed view of your retina **without having to dilate your eyes.*** The wide-field digital image is used for early detection and management of eye diseases such as macular degeneration, glaucoma, retinal detachment, and ocular tumors, as well as systemic diseases such as diabetes, hypertension, and high cholesterol. The digital image will become a permanent part of your medical record and will be compared from year to year to detect any changes. The Optomap Retinal Exam is fast, easy, and comfortable.

- YES! I would like to have the Optomap Retinal Exam as part of my comprehensive eye examination today. I understand that there is an additional **\$35 charge** for this test and that it is not covered by most vision insurance plans. *Dilation may still be necessary in some circumstances.
- NO, I am declining the doctor's recommendation to have the Optomap Retinal Exam as part of my comprehensive eye examination. I understand that the doctor may need to dilate my eyes today.
*Dilation requires eye drops and will cause significant light sensitivity and blurry vision that will last 4-6 hours after your exam.
- I choose to decline both the Optomap Retinal Exam and dilation.

Premier Eyecare Contact Lens Evaluation Fees*

Premier Eyecare uses the accepted vision insurance standard of two separate charges for all contact lens wearers, one charge for a standard eye health exam and an eyeglass prescription and a second charge for the contact lens evaluation and management. You will have a contact lens Evaluation Fee for the evaluation and management of your contact lenses whether you are a current, previous, or new contact lens wearer. You will be responsible for any contact lens evaluation and management fees before a contact lens prescription can be given. Please note that we have some of the most affordable contact lens evaluation fees in the Bakersfield area.

Existing Contact Lens Patient (No Change of Lens Type)

All Types of Lenses	\$49
---------------------	------

Existing Contact Lens Patient (Lens Changes)

Spherical \$57	Astigmatism/Monovision/Multifocal/Color \$65	Specialty Fit \$87
-------------------	---	-----------------------

New Contact Lens Fitting & Training

Spherical \$95	Astigmatism/Color/Monovision/Multifocal \$135	Specialty Fit \$225-\$410
-------------------	--	------------------------------

*This service fee includes evaluation, assessment, and prescription services related to contact lenses (not part of a standard exam). It also includes any follow up visits needed over the course of one year related to the fit or vision through the contact lenses. Visits related to medical conditions (such as infections, allergic reactions, abrasions, etc.) are not included.

I have read and understand the contact lens evaluation fees. Initial: _____
